

Most Probable Questions

1 MARK QUESTIONS

(Very Short Answer Type)

1. What is meant by ecosystem?
2. Define population growth.
3. What is biodiversity?
4. Name any two renewable energy resources.
5. What is carrying capacity in logistic population growth?
6. Define food chain.
7. What is COD?
8. Define BOD.
9. Mention any one source of air pollution.
10. What is global warming?
11. What is noise pollution?
12. What is meant by biotic component of ecosystem?
13. Name the pollutant responsible for ozone depletion.
14. What is equivalent noise level?
15. What is eutrophication?
16. What is meant by solid waste?
17. What is meant by environmental impact assessment (EIA)?
18. What is doubling time in exponential population growth?
19. Why was the Environmental Protection Act established?
20. What is meant by renewable resource?
21. Define logistic population growth.

5 MARK QUESTIONS

(Short Answer Type)

1. Derive the mathematical equation for exponential population growth.
2. Explain logistic population growth with carrying capacity.
3. Describe the causes and effects of water pollution.
4. What are the advantages and disadvantages of landfilling of solid waste?
5. Describe different methods of solid waste management.
6. Explain the concept and objectives of Environmental Impact Assessment (EIA).
7. Differentiate between BOD, COD, and DO.
8. Discuss the principle of BOD test.
9. Write a brief note on eutrophication.
10. Describe different kinds of solid waste.
11. If the present population of the world is 8 billion, calculate the population after 25 years at a growth rate of 1% per year.
12. Explain the role of decomposers in ecosystem functioning.
13. Discuss the structure and functions of an ecosystem.
